

## Risk Assessments at Kingswood

All aspects of our operation are subject to risk assessment by our own in-house team. These are individuals who are qualified and experienced in outdoor education, adventurous activity and health and safety. The content of the risk assessments are subject to further review and scrutiny by external Technical Advisors, statutory regulators and inspectors from the British Activity Providers Association.

All of our risk assessments are reviewed on an annual basis as a minimum, but may be subject to additional review and updates following incidents, external inspections, feedback from user groups or changes to operational practices.

A list of our current risk assessments appears on the following page, together with the activities each covers. Each heading is a hyperlink to open the relevant document and allow downloading or saving.

### **BEFORE YOU DOWNLOAD:**

Please be aware that it may not be a requirement of your Education Authority or external visits approval process that copies of all risk assessments are provided before approval for the visit is granted.

Many Education Authorities operate an approved supplier system, and you should check whether Kingswood is already on this list. We have visits from schools from right across the country, and it is likely that the Kingswood centre you are visiting is already known to your Outdoor Education Advisor.

In addition, all Kingswood Centres carry the Learning Outside the Classroom Quality Badge. This is accepted as assurance that the safety management system is adequate by many Outdoor Education Advisors, and you should check with them before forwarding copies of Kingswood's risk assessments. You can check which Education Advisors accept the Quality Badge at [www.oeap.info](http://www.oeap.info).

<b>Risk Assessment</b>	<b>Covering</b>
<a href="#">3G Swing</a>	3G Swing
<a href="#">Abseiling</a>	Abseiling
